## General Comment

Docket ID#: EPA-R03-OW-2010-0736

I belive that more information and testing needs to be done before any decision is made on this matter. The impact by this on the small farmer is going to be tremedous and we are al ready faced with on heard increases in our expenses. If you ever consider the imprtance of what the small farmer provides for you, you would not move forward with this unless more testing is done. I believe the home owner contributes to the problem more so then the small farmer in over fertilization.
